**Subject:** RE: Salem Parking Zoning

As I am listening the Salem Zoning Subcommittee discuss how to approach to eliminating parking requirements. Here are my comment and suggestion.

When considering parking in and around the Salem center, we need to look at the potential threat and risk landscape along with the safety of the public and retail commerce. What that means is how can we use parking to prevent a bad actor from causing damage to our buildings or causing physical harm to people from launching an attack or explosion. If this has not been done, a risk and threat study maybe needed.

With the right parking strategy, a city can preserve and protect the public, provide the right incentives to builders, and obtain public support. We need to learn from the past (i.e. Portland protesters, Oklahoma bombing, etc.)

V/R,
